The Top 10 Benefits of Traveling for Care

Experience the life-changing benefits of residential mental health treatment for young people and families.

1. Access to the highest-quality residential treatment, rather than whatever is available close to home
2. Comprehensive care for ages 7–11, 12–18, and 18–35, delivered by an integrated team of medical and behavioral healthcare experts
3. Tailored treatment plans designed for each client's and family's specific needs
4. Family-focused approach that strengthens communication and trust among family members
5. Outcomes-driven treatment informed by measurement and analysis of treatment results
6. Structured schedule that allows clients to build new self-care habits and healthy coping strategies
7. Accredited academics and life skills training to further clients' educational and career goals
8. Better success rates, as long-term residential treatment (30–45 days minimum) is proven to yield higher rates of sustainable recovery
9. Safe, home-like environments in beautiful natural settings
10. Supportive peer community and continued connection after treatment via alumni events and support groups

Wondering if your insurance will cover out-of-state treatment?

Newport works with most major insurance companies, both in and out of network, to optimize access to care.
